

We thank you and congratulate you for choosing a BOS product, designed and developed by enthusiasts and handmade with care in France.

Please read carefully the user manual included in your product box, and also available in the download section on BOS's website. It contains the important safety, maintenance, and warranty information you need in order to safely install and use your BOS suspension as well as the detailed set-up, tuning, and service information.

The knowledge of your product will make its use more pleasant

Air pressure:

Whatever your weight, the air pressure should be between 50 and 135 psi.

Note: Pressures are given for guidance only. You can adjust it by ± 5 psi according to your use and your riding style.

Recreational use

Weight (kg)	55	60	65	70	75	80	85	95	105	110
Pressure (psi)	50	60	65	75	80	90	95	105	110	120

Race use

Weight (kg)	55	60	65	70	75	80	85	95	105	110
Pressure (psi)	55	65	70	80	85	95	100	110	115	125

Starting point adjustments:

To start your adjustment, turn the knob clockwise until it stops (clicks = 0). Then, clicks are counted turning the knob counterclockwise.

- Low speed compression (A): 11 clicks
- High speed compression (B): 10 clicks
- Rebound (C): 14 clicks

Platform adjustment:
